

To the clients of Kautex Textron GmbH & Co. KG

Statement regarding environmental labeling of packages

Kautex is a supplier of neutral packages which require labeling in Italy.

This labeling requirement was published in the Official Gazette of the Law/Decree No. 116, which implements the EU Directive 2018/851 on waste and the EU Directive 2018/852 on packaging and packaging waste. The Decree has made important changes and introduced the requirement of environmental labeling for all packages whose circulation has been approved in Italy.

To the extent that the packages lack a label according to the Directive, the required information is indicated on the order confirmations included with the order and/or the delivery notes. In addition, all required information is specified on our home page and/or in the online catalogs. They can be viewed at <https://www.kautex.com/en/packaging/catalogs-brochures> (in German and English).

This complies with the requirements of the Directive for neutral packages. Please note that packages smaller than 125 ml are exempt from the labeling requirement.

Currently, Kautex is working diligently on compliance with the labeling requirement for all existing products.
