General Information						
Overview Business Divisions Kautex Packaging					20/21	
Intended use of products - Materials at Kautex					22	
Data sheet for thermoplastics in general					23	

round, natural colour, with closure

Flexible, squeezable, with good shape-retaining properties, leak-proof.

Also available with dropper cap or wash bottle closure.

Application:

- * dispensing * adhesives * sending samples
- * transport * storage

The packaging concept of Kautex for narrow, medium and wide neck laboratory bottles consists of consumer-optimized order units. Closures and bottles are packed together as one unit and can be ordered in an uncomplicated manner with one article number. This results in the following advantages for both dealers and end-users.

- * one article number for bottle and closure
- * better and clearer handling of the ordered goods
- * dust-free and undamaged packaging
- * easier and quicker to commission bottles and closures
- * the end-user receives original packed merchandise

Packaging concept:

- up to 100 ml: Closures are packed in a polybag which is included in the bottles polybag.
- from 200 ml: Bottles are stretched in foil, corresponding number of closures in a separate polybag in the box.
- from 2000 ml: Bottles packed loosely in the box with screwed-on closures.

A = Diameter body B = Neck i.d. C = Cap size o.d. D = Height without closure

round, natural colour, printed-on hazard-symbols

Laboratory safety wash bottles with printed-on hazard symbols and substances of content in German, English and French language, leak-proof.

Abrasion-resistant printing.

Completely emptied by sliding delivery tube, even when inverted.

Application:

* The delivery nozzle is designed to give an accurate fine controlled stream of liquid.

Suitable for the declared liquids. Not suitable for food.

Safety:

If the delivery tube is raised above the liquid surface then temperature variations will not cause liquid to escape.

Tip with safety tubing.

Jerrycans 2,5 to 5 and 10 to 30 l with UN approval.

Jerrycans 20, 25 and 30 l also available in blue colour.

Universal jerrycan for industry, trade and laboratories.

The jerrycans with a comprehensive range of closure accessories can be used for almost any purpose.

Application:

* storage * packaging * transport

Industrial jerrycan series 353 HDPE, natural colour

Know how and competence

KAUTEX Textron has been specialised in manufacturing extrusion-blown plastic containers for eight decades.

Goal-directed with uncompromising standards for quality and customer focus, we have made our products to belong to the most successful on the international market.

We are meeting the challenges of tomorrow by resolutely leveraging the capacity for innovation and technological leadership in plastics processing of our international group.

Standard Packaging

Special Packaging

- Successful products for laboratories, chemical industries and pharmacy
- Many versions, sizes, materials, accessories
- For special applications also possible with barriers (coex, fluorination)
- Available ex stock
- Many models available with UN approval

- Bottles and jerrycans made of PE, PP, PVC and PETG; for special applications also available with barriers (coex)
- The customer determines the design and pays for the mould; the products are supplied only to this customer
- UN approval available
- Rapid Prototyping concept

The design of the Bayer Crop Science AG bottles and canisters shown in this picture is exclusive to Bayer Crop AG, Monheim, Germany, and may not be sold to any customer but Bayer Crop Science AG.

for successful products

Jerrycans

AgroPack® Product Range

- Jerrycans: 2 l/2,5 l/3 l/5 l/6 l/8 l/10 l/12 l/15 l/20 l/25 l/30 l
- Available ex stock
- UN approval available

- Jerrycans for crop protection agents: 5 l/10 l
- Bottles for crop protection agents: 250 ml/500 ml/1000 ml
- Available with and without barrier (coex)
- UN approval available

The bottles and containers in this catalogue are, if not labeled otherwise, suitable for foods and satisfy the European requirements of Regulation (EC) No. 1935/2004 and Regulation (EU) No. 10/2011¹. The bottles and containers can therefore be used within the European Economic Area as food packaging. We would be glad to provide the corresponding declarations of conformity upon request and recommended closures which are safe for contact with foods and would be suitable for your applications.

The bottles and containers in this catalogue satisfy the European legal requirements for packages for cosmetic goods according to Regulation (EC) No. 1223/2009¹. They are therefore permissible for use within the European Economic Area as packaging for cosmetic products. The conditions for use and notices regarding safe use found in the respective declarations of conformity and product data sheets must be observed.

Our UN packagings satisfy the legal requirements of the GGVSEB and the European agreements ADR, ADN and RID for the carriage of dangerous goods by road, rail and inland waterways. The UN dangerous materials packagings satisfy the requirements of European chemical law for packages for hazardous substances and mixtures according to Regulation (EC) No. 1272/2008.

They are therefore permissible for use within the European Economic Area as packaging for hazardous substances and mixtures. The provision and notices regarding the proper use of the packaging according to the UN permits of the Federal Institute for Materials Research and Testing (BAM) must be observed.

Our products can frequently also be used or adapted for purposes other than those cited. We possess our own productions facilities in which packages of pharmaceutical and medical products can be produced in accordance with GMP standards for pharmaceutical products and medical devices pursuant to Directive 2003/94/EC and Directive 93/42/EEC.

If you have a use in mind for pharmaceutical and medical purposes or a use that deviates from the above, please contact us so that we can find a solution tailored to your needs. The same holds true for uses outside of the European Economic Area and for UN dangerous goods packages that fall outside of the territorial scope of the European agreements ADR, ADN, and RID. Without consulting with us, any uses that deviate from the proper uses listed above lie in the responsibility of the user.

Without UN permits, our products may be used for packaging for hazardous substances and mixtures according to Regulation (EC) No. 1272/2008 only if the user can guarantee that the requirements according to Article 35 of this regulation are observed. This check must be performed by the user on his or her own responsibility. In particular, the user must make sure the respective content does not damage the materials of packages and closures or react with these materials to form dangerous compounds.

Polyolefins (PE): LDPE, HDPE, PP

- physiologically inert
- flexible and inherently stable
- good chemical resistance
- shatter-proof
- PP is autoclavable

Polypropylen (PP)

- rigid and inherently stable
- very good chemical resistance
- features a very good resistance against tension cracking
- in thin layers almost transparent, thicker layers are translucent up to opaque white

Low-density Polyethylene (LDPE)

- flexible, tough and shatter-proof
- in thin layers almost transparent, thicker layers are translucent up to opaque white
- resistant to water, aqueous solutions and most chemicals
- excellent water vapour resistance

High-density Polyethylene (HDPE)

- rigid and shatter-proof
- slightly transparent in thin layers, in thicker layers weakly translucent to opaque white
- resistant to water, aqueous solutions and most chemicals
- excellent water vapour resistance

Polyvinyl chloride (PVC hard)

- physiologically inert
- crystal-clear or transparent brown
- good chemical resistance
- extremely rigid, high breaking resistance
- high transparency
- resistant to water, aqueous solutions, alcohols and oils
- slight gas permeability, e.g. to oxygen
- adequate water vapour resistance in most cases

Co- Polyester (PETG) (Polyethylene Terephthalat Glycole)

- physiologically inert
- flexible and inherently stable
- high transparency (glass-clear), optically brilliant
- shatter-proof
- resistant to water, aqueous solutions, salts, aliphatic mediums, hydrocarbons und oils

¹ The wide-neck spray bottle series 303 LDPE (p. 4), the round bottle series 321 COEX with PA barrier (p. 7), the narrow-neck bottle series 310 „ClearGrip“ (p. 13), and the balloon series 350 HDPE (p. 18) are not suited for contact with food and cosmetics.
